# Made by hand.

Sunset Stone was born in 1970 on Colorado's Front Range. With Castle Rock to our South and the Rockies to the West, our surroundings have always provided us with all the inspiration we could ask for. Our deep appreciation of natural beauty is what drives us to make Sunset Stone the most natural-looking stone veneer you

can buy. Sunset Stone has always been a company committed to hard work and transparency. We pour our hearts into our product and the way we treat our customers. It didn't take long for our reputation to spread beyond Castle Rock.

## Why manufactured stone?

Unlike the fleeting beauty of a sunset, the beauty of Sunset Stone is engineered to endure for generations. Whether you're looking to enhance the curb appeal of your home or add beauty and performance to a hospital, apartment complex or restaurant... inside or out, you'll love Sunset Stone.

You've got choices... and they're all good. Sunset Stone offers you not only a wide range of cast stone profiles and colors, but also the real thing: natural stone. Let Sunset Stone be your starting point when looking to add warmth and drama to a backsplash or fireplace—or an entire façade.

# Anatomy of a Sunset...

## No two Sunsets are ever the same.

At Sunset Stone, we're hands on. Automation has its place, but it's the knowing hands and eyes of an expert that sets a crafted product apart from a mass-produced one. A Sunset Stone is so much more than the sum of its parts... it's a labor of love.

## Color that's crafted... not contrived.

We largely use organic dry colorants which we apply by hand. Hand-veining takes some practice, but the results are stunning and, like a sunset, entirely unique every time.

## Beautiful, through and through.

Manufacturing stone is an ancient craft that dates back to the earliest Romans. At Sunset Stone, we honor many of the techniques and practices that result in enduring beauty. For instance, at the core of every Sunset stone is expanded shale aggregate. It helps to eliminate weight and reduce water absorption, contributing to the overall strength and durability of our stone.

*From...*  
the use of expanded shale aggregate we source...

*to...*  
the personal touch that only hand-veining can produce,

Sunset Stone's attention to the details is what makes our stone products look so real and feel so *natural*.

Sunset Stone manufactures replications of natural stone. Just like in nature, slight texture and color variations are to be expected. The colors you see in our product brochure are close to the actual colors of our stone. However, it is important to note that photography and printing techniques may alter perception of actual colors. Sunset Stone recommends that you obtain a sample of Sunset Stone products before placing your order. ©2024 SUNSET STONE rv0524
